

Non-Rising Stem Gate Valve w/ Post Flange

Used primarily to control water flow in sprinkler systems. This particular valve features a post flange that is designed for use with our vertical post indicator. Comes with a 2" operating nut.

UL Listed. Contact us for current approvals.

300 PSI Rated

Part #	Size
NRS4	4"
NRS6	6"
NRS8	8"
NRS10	10"
NRS12	12"

Specify End Connections:

- GG Groove x Groove
- FF Flange x Flange
- MJ Mechanical Joint x Mechanical Joint
- FMJ Flange x Mechanical Joint

OS&Y Gate Valves

An OS&Y (outside stem & yoke) gate valve is commonly used to control water flow in sprinkler systems. Additionally, the valve stem is visible above the hand wheel when open, and concealed inside the valve body when closed, providing immediate visual confirmation that the valve is either "open" or "closed".

UL Listed. Contact us for current approvals.
